CAREER OBJECTIVE

Motivated Computer Science graduate (B.E., 2026) seeking an ERP Functional Consultant role. Strong in business process analysis, data mapping, SQL, and Power BI – skills directly aligned with ERP implementation and support. Built end-to-end AI and analytics projects demonstrating requirements analysis, data lifecycle management, and stakeholder-ready reporting. Self-motivated fast learner ready to contribute from day one.

EDUCATION

B.E. in Computer Science and Engineering

Arasu Engineering College, Kumbakonam | CGPA: 8.25 / 10.00

Nov 2022 - May 2026

SKILLS

- **ERP & Functional:** Business Process Analysis, Requirement Gathering, Data Mapping, KPI Tracking, Report Automation, Master Data Management, SAP/Oracle BI (Concepts)
- **BI & Reporting:** Power BI, Tableau, Excel (Advanced), Streamlit, Flask
- **Databases:** MySQL, SQLite | **Languages:** Python, SQL, C | **Version Control:** Git, GitHub
- **Libraries:** Pandas, NumPy, Scikit-learn, PyTorch, OpenCV
- **Soft Skills:** Self-motivated, Fast Learner, Critical Thinking, Stakeholder Communication, Problem Solving, Teamwork

PROJECTS

Lost Sales Estimation – FMCG Stockout Analytics [github link](#)

Self-Initiated | Python · SQL · Power BI

May 2025 - Jul 2025

- Simulated ERP inventory module: quantified stockout-driven revenue loss; identified high-risk SKUs via SQL and Python analytics.
- Built Power BI KPI dashboard; mapped demand → stock → loss business process replicating ERP supply-chain reporting.

DermAI – Real-Time Skin Disease Detection Framework [github link](#)

Final Year Project | Python · PyTorch · RepViT-M1 · OpenCV

Jan 2026 - Apr 2026

- Designed end-to-end deep learning system – scoped requirements and mapped data flow from image input to classification output; detects 11 skin conditions using RepViT-M1 vision transformer.
- Optimized for resource-constrained clinical environments – demonstrating delivery of production-ready solutions under real-world constraints.

INTERNSHIP EXPERIENCE

Data Analytics Intern — SD Pro Solutions, Trichy

Jun 2025 - Jul 2025

- Analyzed real-world datasets using Python and SQL to identify trends and generate business insights; built KPI dashboards in Power BI to support data-driven decision-making.
- Developed analytical reports tracking procurement and operational KPIs, translating raw data into actionable stakeholder recommendations.

Data Science Intern — Hitakey Infosys, Trichy

Jan 2026 - Feb 2026

- Performed data analysis and validation on structured business datasets using Python, SQL, and Pandas; generated visualizations to surface insights supporting management decisions.
- Studied core ERP modules (MM, SD, FI), procurement workflows, master data management, and organizational data flow relevant to ERP functional support.

CERTIFICATIONS

- Python for Data Science – NPTEL | Understanding AI Coding Assistants – NPTEL
- Mastering Database Systems with SQL, Python & Tableau – MSME | Building LLM Applications – PALS

ACHIEVEMENTS & ADDITIONAL INFORMATION

- Regular participant in Analytics Vidhya hackathons; practicing on GeeksforGeeks, LeetCode, and HackerRank.
- Open to ERP Functional Consultant, ERP Data Analyst, or BI Analyst roles (fresher) – remote or in-person.
